# ***Trumbull Continuing Education Summer Explorations 2025***

*We are proud of the quality of the Summer Explorations Program. In that regard, there are three areas of focus we continue to accelerate - academic progress, providing enrichment camps, and offering a wide variety of sport opportunities.*

*It is our hope that your child will find more than one summer camp experience that fosters a specific skill, interest, or hobby. We encourage you to take advantage of the experiences available for your child.*

*To ensure the success of Summer Explorations, we encourage students and parents to work with and support all school staff in meeting our program objectives. For it is only through our joint efforts in pursuing our common goals that increased student expectations will be achieved.*

*If you have any questions, please do not hesitate to contact any member of the Summer Explorations staff.*

*Sincerely,  
Trumbull Continuing Education*

# ROBOTICS

**ROBOTICS Brooklyn Robot Foundry (grade completed)**

***Building the Future with Brooklyn Robot Foundry***

Our signature Robot Builder classes are the perfect combination of engineering and crafts for children. Classes feature a short lesson that introduces circuitry, components, and other fundamentals of engineering. Then comes the hands-on fun, as each builder builds that day's robot project. The final design is always up to each builder, as they customize and decorate their creations. Whether it's a robot that lights up, dances, drives, shakes, or something else that builders will love, they'll have a great time making it and will be super proud to take it home afterward! Sign up your builder to build with their own hands, create with their own imaginations, and keep their own robot, forever!

***Cosmotic Chaos***

Blast off into a week of Cosmotic Chaos, where creativity goes to infinity and beyond! Students will get to explore the far-out terrain of their imaginations while building robots that are simply out of this world! From building to crafting to playing, everything about these days will be a meteor-ic marvel and the cosmic fun will be astronomical.
